

LET US BRING PROVEN CxUV DECONTAMINATION WHEN & WHERE YOU NEED IT

In today's world, it is critical to be able to protect the places we live, learn, work, and play against harmful pathogens.

Our CxUV Decontamination Tripod System fitted with three Vantage 1 Units has you covered with a decontamination solution that has been independently validated and is both cost-effective, and operationally effective.

Key Features:

- Full-spectrum pulsed Xenon UV light proven to kill up to 99+% of *E. coli*, MRSA, Norovirus, and Coronavirus in 30 minutes
- With three Vantage 1 units, it provides up to 360° of decontamination coverage, with each Vantage 1 unit covering a 3mx3m(27 square meters) area
- Optional wheels on base for easy mobility between spaces
- Built-in safety (PIR)sensors to de-active units if motion is detected
- Custom carry case to transport and store your CxUV Decontamination Tripod System when not in use

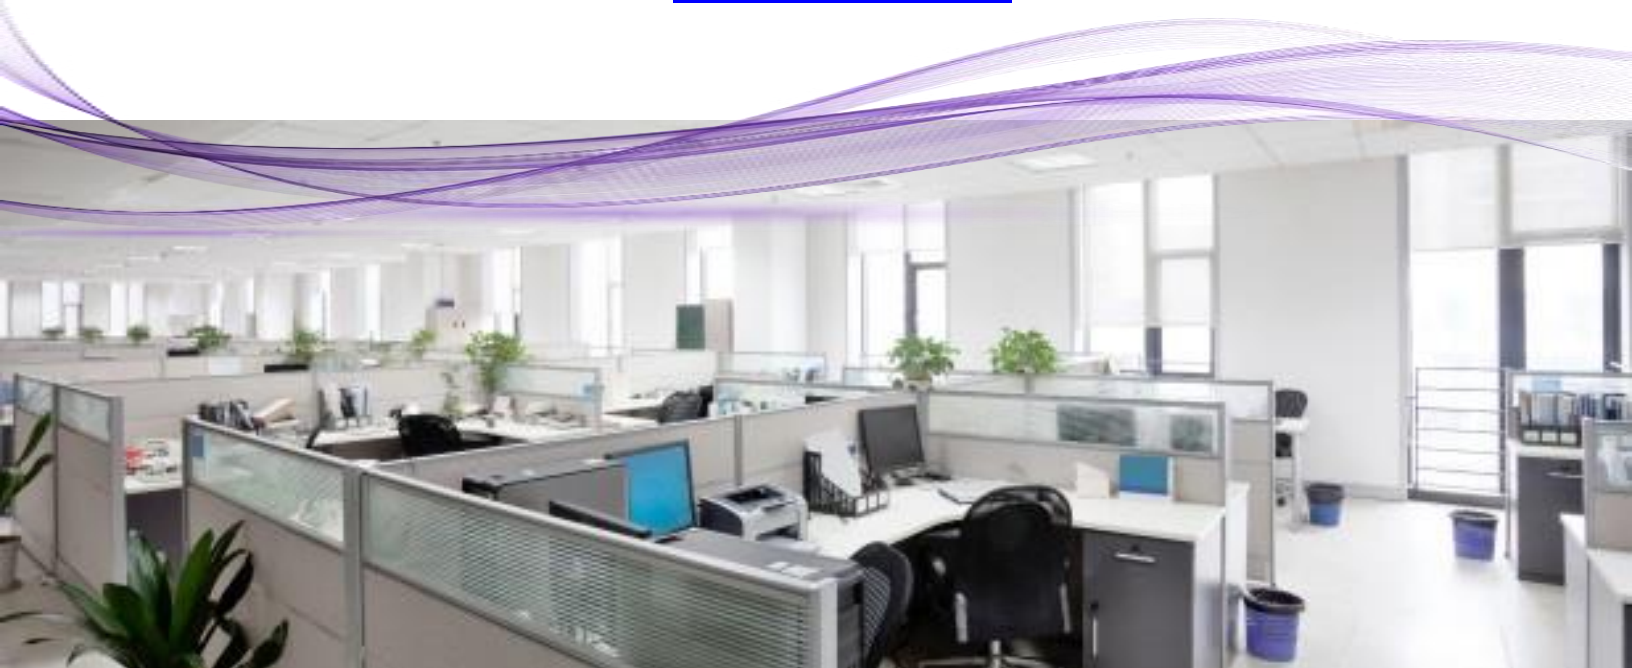

HARNESS THE POWER OF ULTRAVIOLET TO PROTECT YOUR SPACES

The CxUV Decontamination Tripod System is an effective tool to defend against key pathogens* in nearly any environment. The custom case will make it easy to bring the power of UV to the spaces that need it most, including:

- Office Buildings
- Manufacturing Facilities
- Schools & Universities
- Government & Military Facilities
- Healthcare Facilities
- Public Transportation & Aviation
- Emergency Management Vehicles & Buildings
- Athletic Facilities
- Hotels
- Restaurants & Food Service Areas
- Assisted & Senior Living
- And more...
